

## **Database Solutions, LTD., Set to Launch eCRM On-Demand Survey Software**

Monday February 12, 7:30 am ET

eCRM Meets the Needs for Companies Wanting to Measure Customer Satisfaction and Provide Online Surveys

TORONTO--(MARKET WIRE)--Feb 12, 2007 -- DATABASE SOLUTIONS, LTD., (Other OTC:DBSJ.PK - News), a Customer Relationship Management (CRM) and Technology Company for the Insurance and Financial Industries, is pleased to announce today the completion of its online survey product eCRM Survey. eCRM Survey meets the needs of the smallest business to Fortune 500 companies.

eCRM Survey is an on demand software product that will service the needs of companies wanting to design online surveys, collect data and analyze results. Features include Survey Templates, Reporting, Mailing Groups and Live on Demand Feedback. The advantages for companies using the eCRM products are lower costs, faster response times, higher response rates, convenience and anonymity. Pricing will be based on responses generated. Database Solutions intends to receive upwards of a million responses by the end of the first year from its launch date.

Online surveys represents a rapidly growing multi million dollar market that allows an efficient and cost effective solution for companies and government to measure customer satisfaction, provide market research on new products, concept tests, obtain 360 degree feedback and much more.

Mr. Jason Wong, Chief Executive Officer for Database Solutions, LTD., stated, "We have received many request from our customers to provide this type of online on-demand survey product. I believe offering eCRM to our existing customer base will open the doors for new customers that would like to use all of our online CRM products."

About Database Solutions, LTD.

Database Solutions, LTD. is a technology and marketing company in the on-demand Customer Relationship Management (CRM) industry and the software developer of Agent Intelligence. Database Solution's Agent Intelligence Technology is a proprietary browser-based software and was designed specifically for the insurance and financial industries to provide backend administration of insurance policies, financial transactions, client tracking and client marketing/selling strategies for an entire insurance brokerage or insurance company. The Company's family of products includes a comprehensive suite of CRM applications to help enterprises of all sizes, industries and geographies meet the complex challenge of sharing and managing information on-demand. Unlike other insurance administration systems currently on the market, Agent Intelligence focuses on the needs of the broker by simplifying their business while eliminating the paper

administration involved in tracking their clients to increase sales. By automatically tracking all events along the lead development process an agent and/or manager is able to see any weaknesses in an agent's selling process. Automated reports critical to both management and agent are automatically available through the use of the Agent Intelligence System. Agent Intelligence is 100% browser based and requires no hardware or software installation. The Agent Intelligence user also immediately benefits from complete upgrades and on-demand customization.
