

Database Solutions, LTD. Announces the Completion of "Online Intelligence" Customer Support Module

Wednesday April 5, 7:00 am ET

Online Intelligence Provides Customers With Technical and Sales Support While Providing a New Product Offering Available to Other Companies for Their Customer Web Based Support Module

TORONTO--(MARKET WIRE)--Apr 5, 2006 -- Database Solutions, LTD. (Other OTC:[DBSJ.PK](#) - [News](#)), a Customer Relationship Management (CRM) and Technology Company for the Insurance Industry, today announced that it has completed its "Online Intelligence" customer support solutions product. Online Intelligence will be utilized for the company's own software support and sales departments. In addition, Online Intelligence will be available as a hosted service incorporated into Database Solutions' expanding line of products, and is available to other companies desiring to establish their own customer web based support module.

Online Intelligence is a hosted solution, and will not require our clients to have any special software or server that would incur additional costs. Online Intelligence creates an effective method for customer support that will easily increase sales, reduce costs, and improve customer service by providing an easy real-time connection with website visitors. Online Intelligence will greatly benefit Database Solutions' sales and support team, as well as provide an excellent new service to our current line of products.

Mr. Jason Wong, Chief Executive Officer of Database Solutions, LTD., stated, "We are pleased to provide this valuable service for our customers. This new product further demonstrates our desire for Database Solutions to be the CRM of choice to the Insurance Industry."

About Database Solutions, LTD.

Database Solutions, LTD. is a technology and marketing company in the on-demand Customer Relationship Management (CRM) industry and the software developer of Agent Intelligence. Database Solutions' Agent Intelligence Technology is a proprietary browser-based software and was designed specifically for the insurance industry to provide backend administration of insurance policies, client tracking and client marketing/selling strategies for an entire insurance brokerage or insurance company. The Company's family of products includes a comprehensive suite of CRM applications to help enterprises of all sizes, industries and geographies meet the complex challenge of sharing and managing information on-demand. Unlike other insurance administration systems currently on the market, Agent Intelligence focuses on the needs of the broker by simplifying their business while eliminating the paper administration involved in tracking their clients to increase sales. By automatically tracking all events along the lead development process an agent and/or manager is able to see any weaknesses in an agent's selling process. Automated reports critical to both management and agent are automatically available through the use of the Agent Intelligence System. Agent Intelligence is 100% browser based and requires no hardware or software installation. The Agent Intelligence user also immediately benefits from complete upgrades and on-demand customization.
