

# Database Solutions, Ltd., Ready to Launch "Backup Intelligence" On-Demand Web-Based Document Management Service

Tuesday September 26, 8:00 am ET

## Service Saves Time and Money for Any Company Looking to Provide a Secure Document Sharing Tool for Their Workforce

TORONTO--(MARKET WIRE)--Sep 26, 2006 -- DATABASE SOLUTIONS, LTD., (Other OTC:[DBSJ.PK](#) - [News](#)), a Customer Relationship Management (CRM) and Technology Company for the Insurance Industry, will soon launch Backup Intelligence, a web-based document management service that will provide any Company and their workforce with a cost effective secure document sharing tool utilizing Database Solution's secure on-demand Backup Intelligence Server.

Backup Intelligence is Database Solution's new document management service that will allow workforces from all industries to log in via the Internet to perform their day-to-day business functions. Subscribers to the service will be able to store their documents, search documents, scan to web, as well as tag files to a specific contact entered into our secure contact manager interface. Backup Intelligence especially will be useful for those companies employing mobile field personnel.

Mr. Jason Wong, Chief Executive Officer for Database Solutions, LTD., stated, "We have had many requests from companies to provide a service like this and we are pleased to announce Backup Intelligence as an exciting add on to our Intelligence line of services." Mr. Wong continues by stating, "Backup Intelligence will provide our clients with a secure cost effective solution for storing their business critical files, saving them on hardware cost and allowing for 24/7 remote staff access. These services are already integrated in our Insurance CRM Agent Intelligence product and will provide an extended audience into new market places."

About Database Solutions, LTD.

Database Solutions, LTD. is a technology and marketing company in the on-demand Customer Relationship Management (CRM) industry and the software developer of Agent Intelligence. Database Solution's Agent Intelligence Technology is a proprietary browser-based software and was designed specifically for the insurance industry to provide backend administration of insurance policies, client tracking and client marketing/selling strategies for an entire insurance brokerage or insurance company. The Company's family of products includes a comprehensive suite of CRM applications to help enterprises of all sizes, industries and geographies meet the complex challenge of sharing and managing information on-demand. Unlike other insurance administration systems currently on the market, Agent Intelligence focuses on the needs of the broker by simplifying their business while eliminating the paper administration involved in tracking their clients to increase sales. By automatically tracking all events along the lead development process an agent and/or manager is able to see any weaknesses in an agents selling process. Automated reports critical to both management and agent are automatically available through the use of the Agent Intelligence System. Agent Intelligence is 100% browser based and requires no hardware or software installation. The Agent Intelligence user also immediately benefits from complete upgrades and on-demand customization.
